About us

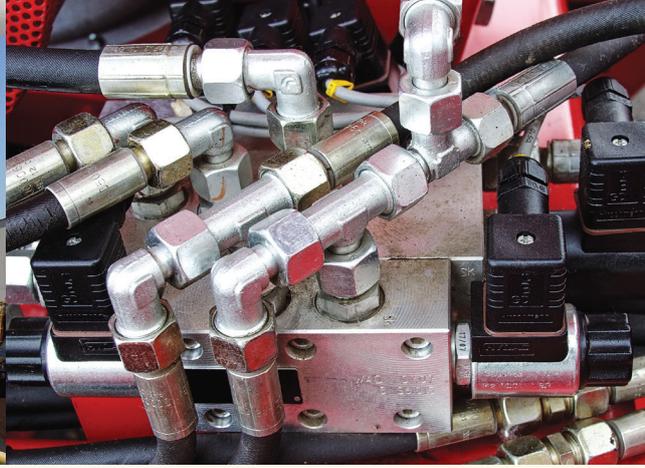

Beasley's is a privately owned company that provides high quality hydraulic, pneumatic and engineering solutions around the state, Australia, and the world - assisting businesses with their fluid power requirements.

Beasley's provides a complete package of services, from conceptualisation and design phase of a project, right through to installation and commissioning. All staff are highly trained and together, have a vast interdisciplinary knowledge of hydraulic, pneumatic and engineering solutions. We take a 'whole of system' approach to our work aiming to provide clients with solutions which are reliable, efficient and exceed their expectations by providing better service using world leading suppliers.

Capability overview

There is no substitute for experience and expertise, which is why it's sometimes easier to just call Beasley's. In exacting multidisciplinary projects, you need assurance in all areas. Downtime and delays are costly. Beasley's provide the same level of care and commitment to every job, regardless of site, client, size, or deadline. Which is why our clients are among the first to recommend us. That's the assurance Beasley's deliver.

24/7 FIELD SERVICE	SYSTEM DESIGN	INSTALLATION & COMMISSIONING	POWER UNIT MANUFACTURE
On-site repairs	Innovative design	On-site unpack, assemble, testing	Fixed, variable, load sense and hydrostatic
Expert technicians	Problem solving	Commissioning, training, handover	Individual design
Purpose built service vehicles	Complete or partial solutions	Lubrication systems	Quality components
Diagnostic, repairs & maintenance	Proof of concept	Hydraulic systems	In-house design
Mobile hose support	Circuit simulation	Refuelling systems	Mining, lubrication, Industrial
Preventative service	Rigorous validation & simulation	Pneumatic systems	Mining, automotive, agricultural
Seven response vehicles	Training programs	Fire suppression systems	Lift systems, grain augers
Prompt response	Documentation	Auxillary power units	Compactors, sorting systems
Scheduled & unscheduled requirements		Hydraulic or pneumatic hose reels	Brake systems

Beasley's - your hydraulic, pneumatic and engineering resource for over 40 years

Working on the philosophy of 'service beyond all expectations', Beasley's has undertaken projects, repairs and maintenance in several industries, working to tight deadlines in uncompromising conditions to deliver world class solutions.

Putzmeister Pumping

Beasley's is the Australian, New Zealand and Papua New Guinea agent for the global pump manufacturer, Putzmeister. We sell, install and commission tailored pumping solutions to the mining, energy, and environment sectors. These are fully supported through technical engagement, site visits, maintenance programs, and genuine spare parts. Reliable conveyance of tailings, slurry and various types of biomass with minimal wear and maximum efficiency are essential. That's why Putzmeister is the largest global manufacturer and most reliable brand when it comes to fault free, non-stalling conveyance of all types of materials in all types of demanding locations. Beasley's is truly an international business and preferred agent of one of the most dynamic and reliable pump manufacturers in the world today.

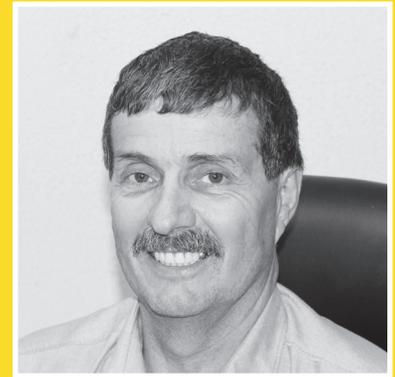

Working smarter to save you time and money

With our advanced and world class, purpose built test facilities and accurate diagnostic equipment in Bundaberg, we can rigorously test open or closed-loop pumps, motors, cylinders and other components. Combined with our strong repair capabilities, we can repair more, and replace less, potentially saving you time and money. Beasley's is the home of innovation in hydraulics, pneumatics and engineering.

“Beasley’s specialises in design, installation, commissioning and maintenance of equipment for the agricultural, construction and mining industries throughout Australia.

Our collective approach to business that involves clients, suppliers and employees, ensures our solutions always lead through innovation and reliability. This promise to our clients is supported by a comprehensive spare parts inventory and delivery system together with our state of the art diagnostic and testing facilities in Bundaberg, QLD. It’s no coincidence that our status and reputation as a preferred supplier has expanded globally, and we look forward to working with new clients, with new challenges.”
